

Godrej Riverine — Data Dictionary

Project: Godrej Riverine CRM, Marketing, Sales & Inventory Analytics
Version: 1.0 **Author:** Shreyansh **Last Updated:** [fill in today's date]

A data dictionary is the single source of truth for every field in your database. Anyone (including future-you, 6 months from now) should be able to open this file and understand exactly what each column means, what values it can hold, and how tables connect — without having to re-read the raw CSVs.

1. Customers
